CUSTOM DESIGNED SHOPS

You invest a lot of time and effort working so you can enjoy life's diversions. That might mean spending time in your wood shop or tinkering with your car collection. It might mean storing and maintaining a boat, RV or your fleet of snowmobiles. Or it might just mean hanging out in your personal rec/entertainment room. Whatever it means to you, if it means you need a building, consider a Cascade building!

40 x 60' SHOP WITH 12 x 60' ROOF SHED AND CUSTOM CUPOLA

POLE BUILDING KITS

Pole buildings are economical, quick and easy to erect. All of our kits include the materials and plans for the complete pole building.

CUSTOM HORSE BARNs

CUSTOM HORSE BARN WITH 2x6 T.G. SIDING

Few building projects can compete with equestrian facilities for the very personal and complex nature of their design.

Indeed, they often require the combining of stalls, riding arenas and living quarters who live and breathe the same passion as you. Cascade Pole Buildings can get the job done.

HORSE ARENAS

When you think of riding arenas, you naturally think of expansive, unobstructed space. That's when you should think of Cascade Pole Buildings with its wide array of clearspan arenas with widths up to 84'.

BUILDING STYLES

Cascade Pole Buildings was established to provide top quality custom pole buildings to the residential, agricultural and commercial customer.

Our post frame buildings feature systems of widely-spaced, pressure-treated posts that are embedded in the ground and function as the foundation, structural frame, and wind bracing mechanisms. Each structure is covered with Steel Siding and Roofing backed with a manufacturer's warranty*.

Our pole buildings are highly resistant to fires, earthquake, flood, and wind forces, and are energy efficient.

ROOFING AND SIDING

All Cascade Pole Buildings come standard with 29 Gauge painted steel. Cascade Pole Buildings uses the finest available steel roofing and siding backed up by a 40 year limited warranty.

*OPTIONS FOR ROOFING INCLUDE:
ASPHALT SHINGLE 16" LOCK SEAM.*

*OPTIONS FOR SIDING INCLUDE:
BOARD & BAT, LAP, AND T-111.*

LIGHT PANELS

Fiberglass/ polycarbonate light panels: Light Panels whether on the roof or the wall help to light up your building while saving you money at the meter! Upgrade to polycarbonate if you are looking for extra durability.

*SHOP WITH OVERHEAD DOORS
AND EAVES LIGHT PANELS*

ROOF OVERHANG

*40' X 60' SHOP WITH
18" ROOF OVERHANG*

18" roof overhang adds protection as well as a touch of class to your project. It comes standard with open soffit and 2"X6" barge/fascia boards.

CONCRETE FLOORS

Cascade Pole buildings offer 4" & 6" concrete floors for your building. Available in smooth, broom, or tine finish.

COMPLETE STALL SYSTEMS

We offer complete stall systems. Our stall fronts are all galvanized steel with optional feed door. Wood inserts are usually 2"x6" tongue and groove.

STALL FRONTS

STALL FRONTS

BACK VIEW OF THE STALL FRONT

You can see that Cascade Pole Buildings is truly looking out for the best interests of the horse lover. It all adds up to the best value available in the equestrian world and a comforting peace of mind for you!

STALL FRONTS WITH FEED DOOR

CUSTOM TACK ROOMS

We also offer custom:

- Tack rooms
- Viewing rooms
- Wash racks
- and more...

TO ORDER CALL: 866-55-BARNS

1 Truss Placement
Trusses are "sandwiched" onto columns/posts and typically nailed with 16d hot dipped galvanized nails. Corbel blocks placed beneath the trusses help carry the roof load.

2 Trusses
Pre-engineered trusses ensure accuracy and guarantee your load requirements are met.

3 Siding/Roofing
Minimum 29 gauge, grade E panels. Will support 236 pounds per square foot on a 24" span.

4 Posts/Columns
Posts are primarily full sawn, rough, grade stamped (#2, #1 or Select Structural) and pressure preservative treated for structural in-ground use.

5 Doors
Available options include horizontal sliding, overhead (garage door type), people entry doors and Dutch doors.

6 Roof Purlins
Roof Purlins sized and spaced according to your building needs. A minimum of 2" x 6".

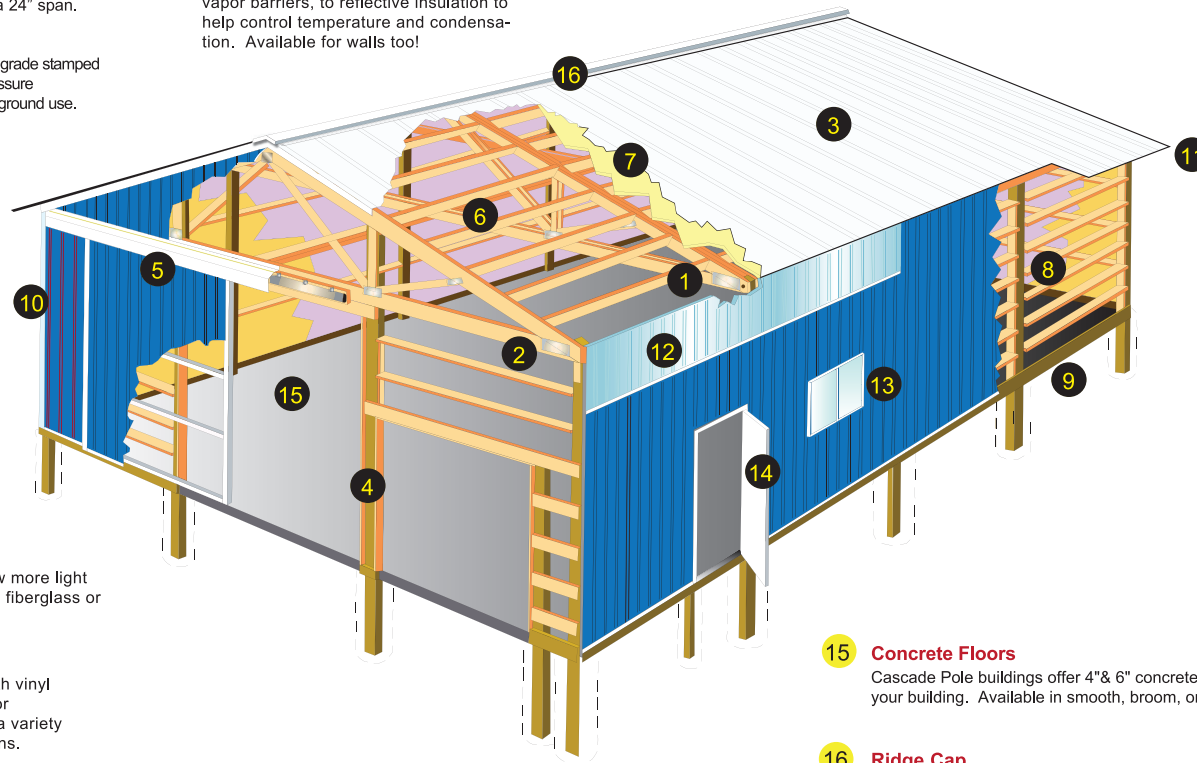

7 Roof / Vapor Barrier Insulation
Available options include basic rufco vapor barriers, to reflective insulation to help control temperature and condensation. Available for walls too!

8 Wall Girts
Usually spaced 24" on center to support your wind load requirements. Available in commercial style to allow for future finishing.

9 Skirt Boards
Standard 2"X 8" pressure treated helps protect your wall metal from ground contact. Also acts as an excellent border for your concrete floor.

10 Building Trim
Available in a variety of colors to accent your building.

11 Roof Overhang
Optional 18" overhang allows a little extra protection from the Northwest weather. Looks nice too!! Comes standard at 18" with 2"X6" fascia and large boards, open soffit. Optional sizes available.

12 Eavelights
24" or 30" eavelight panels allow more light into your building. Available in fiberglass or highly durable polycarbonate.

13 Windows
All windows come standard with vinyl frames, dual pane and low-e for performance. Options include a variety of sizes, colors and grid patterns.

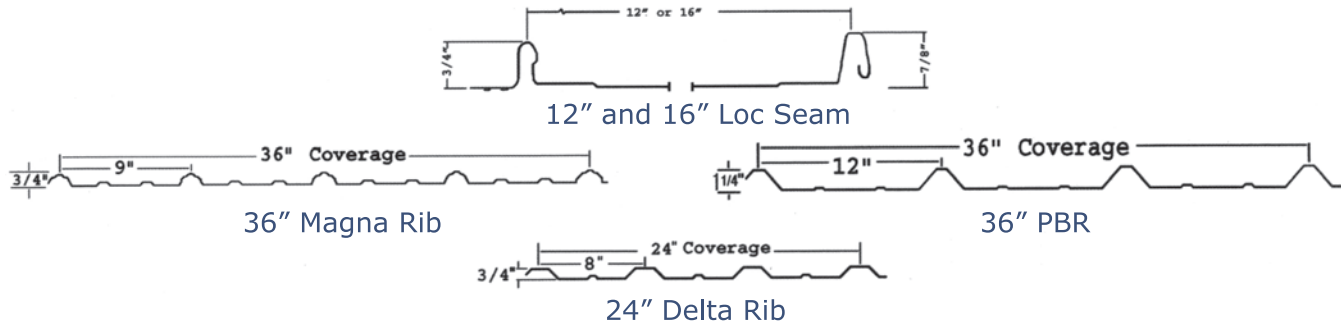

14 Entry Doors
Come standard with keyed lockset. Available in many styles and sizes.

15 Concrete Floors
Cascade Pole buildings offer 4" & 6" concrete floors for your building. Available in smooth, broom, or tine finish.

16 Ridge Cap
All buildings come standard with Uni-vent™ foam enclosure strips. This allows maximum airflow in your building.
